

We provide unrivalled digital access to the NHS, generating income for NHS Trusts and Health Boards across the UK. We deliver services with passion, energy and flexibility whilst ensuring that quality is never compromised.

We are experiencing an exciting time of change and development and we require a Junior Software Developer to join our small friendly team with the opportunity to work across a number of bespoke projects. You will be highly motivated and organised with a strong attention to detail. In return you will have the opportunity to learn from our experienced team.

You will work mainly at our Head Office at Falmer, Brighton with the opportunity to work remotely some of the time.

Overall, the Junior Software Developer will be accountable for:

Developing applications to meet clients' requirements
Support existing applications (bug fixing and general up keep)
Communicating with clients to gather requirements
Assist in the development of internal PHP systems

Key attributes and competencies:

Strong analytical and technical troubleshooting ability.
A passion for diagnosing and solving complex technical problems.
Coding Ability- Some or all of the following:

- PHP OOP and MVC – preferably the Laravel framework
- MySQL / Eloquent
- JavaScript and jQuery knowledge
- HTML and CSS
- Ajax/JSON
- Git / Bitbucket
- Composer / NPM / Webpack, Yarn.

The ideal candidate will have the ability to understand the core of a problem and research possible solutions using relevant online resources, and will be a pro-active self-starter who takes ownership of issues until resolution.

Professional experience and education:

Ideally, you will be educated to degree level (or equivalent) preferably in computer science and have practical knowledge of PHP, having previously completed a project in PHP.

Reporting line: Chief Technical Officer

Hours of Work: Monday to Friday 09:00 – 17:00 (35 hours per week)

Salary £23,000 - £26,000 per annum

Closing Date: Friday 30 April 2021, 17:00
